What is Scene Flow?

"Scene flow is a dense three-dimensional vector field defined for each point on every surface in the scene"
[Vedula et al. 2005]

Scene Flow

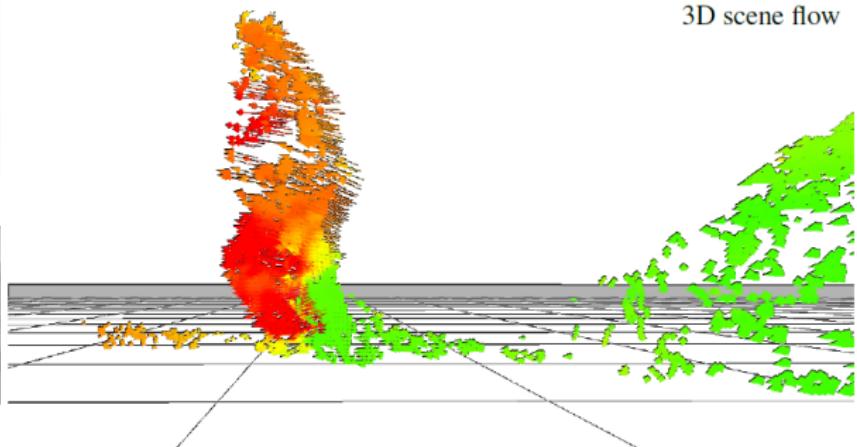

Application: Autonomous Driving

left image at time t

left image at time $t + 1$

[Wedel et al. 2010]

Piecewise rigid scene flow. ICCV, 2013.

“Most of the **structures** in the visual world
are rigid or at least nearly so.” [David Marr]

This Work

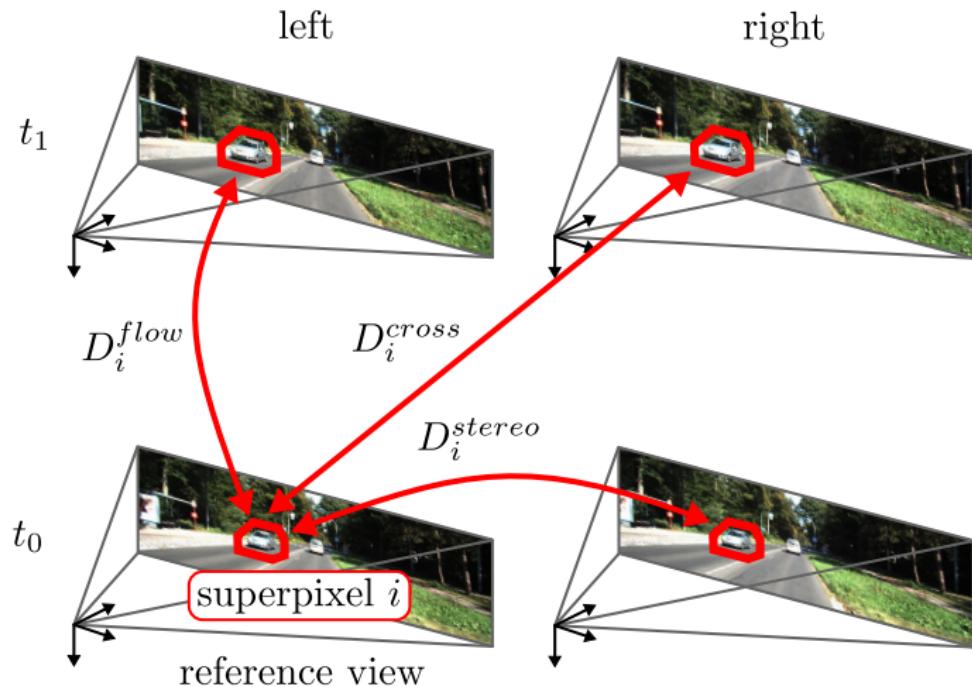

Observation:

- Many scenes decompose into small number of rigid objects
- Objects can be described by their shape and rigid motion
- Dramatic reduction in the number of parameters:

$$4 \times N_{Superpixels} + 6 \times N_{Objects} \quad << \quad 9 \times N_{Superpixels}$$

Object Scene Flow

Object Scene Flow

Object Scene Flow

- Let \mathcal{S} and \mathcal{O} denote the set of superpixels and objects
- Superpixel $i \in \mathcal{S}$: $\mathbf{s}_i = (\mathbf{n}_i, k_i)^T$
 - Normal \mathbf{n}_i ($\mathbf{n}_i^T \mathbf{x} = 1$)
 - Object index k_i
- Object $i \in \mathcal{O}$: $\mathbf{o}_i \in SE(3)$
 - Rigid motion parameters
- Discrete-Continuous CRF Energy:

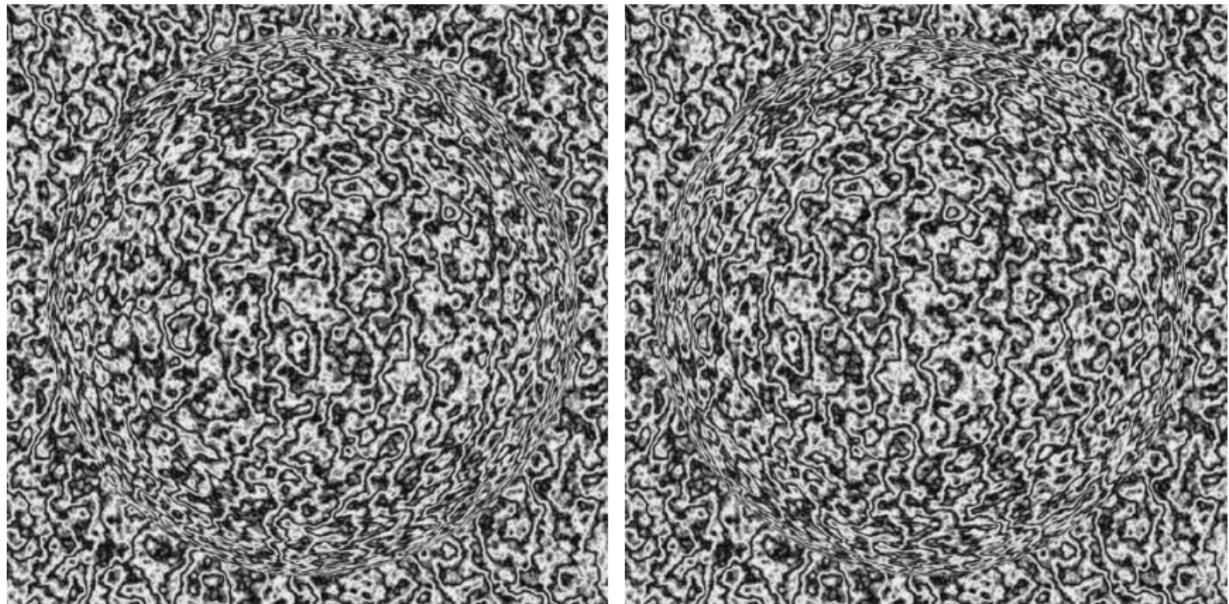

$$E(\mathbf{s}, \mathbf{o}) = \sum_{i \in \mathcal{S}} \underbrace{\varphi_i(\mathbf{s}_i, \mathbf{o})}_{\text{data}} + \sum_{i \sim j} \underbrace{\psi_{ij}(\mathbf{s}_i, \mathbf{s}_j)}_{\text{smoothness}}$$

- superpixel variables $\mathbf{s} = \{\mathbf{s}_i | i \in \mathcal{S}\}$
- object variables $\mathbf{o} = \{\mathbf{o}_i | i \in \mathcal{O}\}$
- Minimize $E(\mathbf{s}, \mathbf{o})$ using MP-PBP

Scene Flow Dataset

- Accumulate static background from 7 laser scans (ICP+GPS)
- Fit a 3D CAD model to each moving object ...

- ... using non-linear least squares minimization:

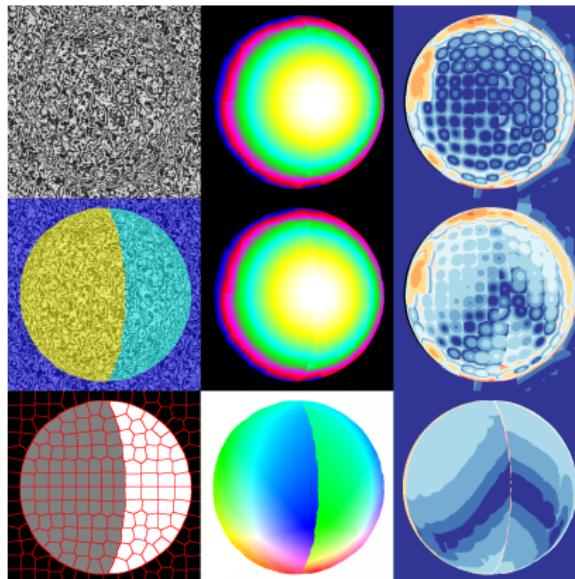

$$E(\xi) = \sum_{t \in \{1,2\}} E_t^{3D} + E_t^{SGM} + E_t^{2D}$$

Scene Flow Dataset

Experimental Results

Results on Synth. Sphere [Huguet et al., ICCV 2007]

	Valgaerts	Huguet	Wedel	Vogel	Ours
RMSE 2D Flow	0.63	0.69	0.77	0.63	0.55
RMSE Disparity	3.8	3.8	10.9	2.84	2.58
RMSE Scene Flow	1.76	2.51	2.55	1.73	0.75

Results on Proposed Scene Flow Dataset

	bg	fg	$bg+fg$
Huguet et al.	67.94	69.63	68.25
GCSF (Cech et al.)	53.20	66.39	55.57
SGM + LDOF (Brox et al.)	44.38	54.77	46.25
SGM + Classic+NL (Sun et al.)	38.65	60.72	42.62
SGM + Sphere Flow (Hornacek)	23.51	50.48	28.36
PRSF (Vogel et al.)	14.07	48.49	20.26
Object Scene Flow	7.44	45.30	14.25

- Percentage of bad pixels
- D1/D2: disparity error, Fl: flow error, SF: scene flow error
- bg: background, fg: foreground, bg+fg: all image regions
